## **DETAILED ACTION**

- 1. Claims 1-6 of US Application No. 10/808984, filed on 03/24/2004, are presented for examination.
- 2. The information disclosure statement (IDS) filed on 04/27/2006 is in compliance with 37 CFR 1.97 and is being considered by the examiner.
- 3. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Canada on March 24, 2003. It is noted, however, that applicant has not filed a certified copy of the 2,423,353 application as required by 35 U.S.C. 119(b).

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rasmussen (5,964,072) in view of Gibson (6,047,513).
- 6. Regarding claim 1, Rasmussen discloses construction framework for buildings (structures) comprising a plurality of base members each having an inwardly facing opening, with said base members extending about a perimeter of the building structure (Fig. 18 & 19); a plurality of studs extending upwardly from said base member.

Rasmussen does not teach a concrete base, a plurality of rafters, or a roof mounted on said rafters.

Application/Control Number:

10/808,984 Art Unit: 3633

- 7. Gibson teaches a plurality of rafters extending between a pair f wall sections (Fig. 2).
- 8. It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to have combined the framework of Rasmussen with the Rafters of Gibson because it is well known in the to construct a building with a roof structure.
- 9. It is also well known in the art for the roof structure to be covered in a roofing material, usually plywood in residential construction.

Additionally it is well known in the art for such structures to have reinforced concrete slabs as their base in witch the base structure members are connected too, via anchors, masonry screws, masonry nails or other methods.

- 10. Regarding claim 2, Rasmussen discloses construction framework for buildings (structures) comprising a plurality of base members wherein said base members comprise an outwardly facing sidewall, inwardly extending top and bottom walls, And flanges located at the distal end of each said top and bottom wall (Fig. 18 & 19).
- 11. Regarding claim 3, Rasmussen does not disclose, but does teach the use of a plurality of laterally extending members, wherein the lateral members extend between and enter connecting said studs. (See dotted lines of Fig. 18)
- 12. Regarding claim 4, Rasmussen in view of Gibson teaches a plurality of rafter connecters (Gibson (22)) having a generally U-shaped cross section configuration.
- 13. Regarding claim 5, it is well know in the art that the concrete base of building structures include reinforcing mesh imbedded in said base. Commonly used in concrete slabs about 4" or greater.

Application/Control Number:

10/808,984

Art Unit: 3633

14. Regarding claim 6, Rasmussen in view of Gibson comprises a plurality of base members, each having a generally C-shaped configuration; a plurality of metallic studs; a plurality of rafters; a plurality of rafter connecters, wherein the connectors being a sheet metal member having slots formed therein; and a plurality of rafter retainer members, wherein said rafter retainer members being a sheet metal member having slots formed therein to permit bending to form a substantially U-shaped component.

## Conclusion

- 15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 16. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerome B. Myers whose telephone number is (571) 270-3097. The examiner can normally be reached on Mon-Fri, 7:30AM-5:00PM, Alt. Fri Off, EST..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Chilcot can be reached on (571) 272-6777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
